

WSFR Home

The FA Wiki is a knowledge base built to contain information, documents, and links to FWS Financial Assistance policies, laws, rules, guidance, and best practices for individuals who have grant program and/or cooperative agreement management or grantee/recipient responsibilities. It provides a lasting, accessible knowledge base of guidance for our respective Financial Assistance managers, specialists, and award recipients.

The pages in the FA Wiki are being developed by many users providing content to develop a knowledge base for Service and state partner grant managers, coordinators, and grantees.

In the past we often cataloged our institutional WSFR Program knowledge by using:

Guidance documents

Email (archives and message threads)

Employee experience (subject matter experts)

The FA Wiki does not replace these sources of information and guidance. However, it does allow us to bring those information resources together into one tool that documents and preserves the information in a manner that is accessible to everyone. In addition, the wiki provides collaboration tools that provide opportunities for all WSFR Program partners to work together to create clear and consistent guidance and best practices.

Thanks for joining us.

Questions, comments, and suggestions about the FA Wiki can be submitted from within the wiki by clicking on the e-mail link found at the bottom of every page.
