

WSFR Announces Real Property Webinars

Join the The U.S. Fish and Wildlife Service's Wildlife and Sport Fish Restoration Program (WSFR) for our Real Property Chapters Webinars. We are hosting two sessions on November 12, 2014. The webinars will focus on answering technical questions, clarifying issues and providing background information you might find helpful in preparing your comments. Some of you may already have recommendations for alternative language. We encourage you to record opinions and recommendations on the FA Wiki. We plan to focus on technical or general questions during the webinars.

For information follow the link below.
