

50 CFR 80 Update

Approach, Schedule, and Supporting Information Home

Thank you for visiting this site and for your interest in the regulations that support the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration programs.

From April - August 2016 a team consisting of WSFR and State members worked on developing a schedule that will allow us to move forward with a phased approach to rulemaking. These phases are designed to allow reviewers to address topics over four rounds of rulemakings that are spread out over an extended period of time. The documents in this space will give you more details on our approach, the schedule, ways to engage, and updates on activities associated with the process.

Many thanks to the Team members and all who support us.
